

21. Genito-urinary system Normal
 22. Nervous system Normal
 23. Laboratory procedures: Kahn Positive Wassermann Positive
 Urinalysis: Sp. gr. 1.020 Albumin None Sugar None
 Microscopical (if indicated) None
 Other laboratory procedures None indicated

24. Remarks on defects not sufficiently described: Examination chest reveals bony framework within normal limits. Left base of diaphragm is elevated and irregular with tenting defect due to an adhesion. Rilar markings are heavy bilaterally and the peripheral markings are beaded and heavy, interspersed to the periphery in all lobes and areas, particularly the upper 2/3 of the lung fields. Beading and nodules formation is of the coarse type characteristic of silicosis. There is beginning of emphysema of some of the nodules. There is pleural thickening in both lung fields. No evidence of tuberculosis involvement. There is no radiographic evidence of this type of tuberculous involvement. B. J. P.

25. Corrective measures, or other action recommended None
 26. Is the individual permanently incapacitated for active service? Yes, R.P.P.
 If yes, specify defect silicosis, beaded edges
 27. If applicant for appointment: Does he meet physical requirements? Yes
 If rejection is recommended, specify reasons None
 Do you recommend acceptance with minor physical defects? Yes

28. Examinee states he is not drawing a pension, disability allowance, or compensation or retired pay from the U. S. Government.
 If yes, state disability None

REPORT OF PHYSICAL EXAMINATION

(See AR 40-100 and 40-105)

Instructions.—Unless otherwise provided, this form will be used for all physical examinations of officers, nurses, or warrant officers; applicants for appointment as such in the Regular Army, National Guard, or Officers' Reserve Corps; and enrollment in the Reserve Officers' Training Corps. Use typewriter if practicable. Attach plain additional sheets if required.

1. McKAY DOUGLAS C Civilian
(Last name) (First name) (Middle initial) (Serial number)

2. — — Age 49 Years of service 2 (last war)
(Grade) (Organization and arm or service) (Nexus: birthday) (Whole number only)

3. Nature of examination: Direct Appointment Component of Army: Army of United States

4. Typhoid vaccination. No. series completed: Five Last series: December 1943

5. Date of last smallpox vaccination: December 1943 Type of reaction: Vaccinoid

6. Other vaccination or immunity tests: Tetanus, January 1944

7. Medical history: Tonsillectomy 1928.
No serious illnesses, operations or injuries.
No history of malaria.

8. Eyes: Presbyopia, bilateral.
 Distant vision: Right 20/20 correctible to 20/— by —
 (Snellen type) Left 20/15 correctible to 20/— by —
 Near vision: Right J# III correctible to J# I by +1.75 sphere.
 (Jaeger type) Left J# III correctible to J# I by +1.75 sphere.
 Refraction (under cycloplegic): Right Not indicated Left Not indicated.
 Color perception (red and green): Normal.

9. Ears: Normal.
 Hearing (low conversational voice): Right 20/20 Left 20/20. Audiometer (percent loss): Right — Left —

10. Nose and throat: Normal

11. Teeth: Right (Examinee's) Left

 Remarks, including other defects: All missing teeth are now under construction at B.S.#3 Dispensary. Classification: III.
 Prosthetic dental appliances: None

12. Posture: Good Figure: Medium Frame: Medium
(Erect, good, flat, bad) (Slender, medium, stocky, obese) (Light, medium, heavy)

13. Temperature: 98.4 Height: 57 1/2 inches. Weight: 150 pounds. Chest: Rest 36 1/2 inches; inspiration 38 inches; expiration 35 inches. Abdomen: 30 inches.

14. Cardiovascular system: Heart: Normal.
 Blood pressure: S. 118 D. 81. Pulse: Rate—Sitting 80 Immediately after exercise 120
 Two minutes after exercise 80 Character: Regular.
 Arteries: Normal Varicose veins: None.

15. Respiratory system: Normal

16. X-ray of chest: Normal, mild changes. See Par 24. RR

17. Skin and lymphatics: Normal. Endocrine system: Normal.

18. Bones, joints, and muscles: Normal. Feet: Normal.

19. Abdominal viscera: Normal.

20. Hemis: None. Hemorrhoids: External, mild, M.N.D.

1. Applicant must be in possession of uniform, except active duty, special.
 2. Regular Army: National Guards Officers' Reserve Corps; Reserve Officers' Training Corps.
 3. Annual physical examination, record only for post pay.
 4. Annual physical examination, record only distant and near vision, and state whether defect is properly corrected.
 5. Vision test only.
 6. Not necessary for annual physical examination.
 7. If applicant for appointment in Regular Army because of mobilization, send plaster models to the Surgeon General.
 8. Required for mobilization for construction.

21. Genito-urinary system Normal
 22. Nervous system Normal
 23. Laboratory procedures: Kahn Positive Wassermann 1
 Urinalysis: Sp. gr. 1.020 Albumin None Sugar None
 Microscopical (if indicated) None
 Other laboratory procedures None indicated

24. Remarks on defects not sufficiently described Left lung pneumonia about middle lung (consolidation within normal limits). Left dome of diaphragm is elevated and irregular with tenting. Heart due to an elevation. Other markings are heavy bilaterally and the pulmonary markings are normal and heavy, intermingled to the periphery in all lobes and zones, particularly the upper 2/3 of the lung field. Spading and not in fissures is of the lance type character typical of silicosis. There is no evidence of any of the nodules. There is pleural thickening in both lung fields. There are some small nodules in the lower lung fields. There is no evidence of this type of tuberculosis.

25. Corrective measures, or other action recommended None

26. Is the individual permanently incapacitated for active service?
 If yes, specify defect None

27. If applicant for appointment: Does he meet physical requirements?
 If rejection is recommended, specify reasons Do you recommend acceptance with minor physical defects?

28. Enumerate states he is drawing a pension, disability allowance, or compensation or retired pay from the U. S. Government.
 If yes, state disability None
