TO : Distribution as below.

Information Report No. 622DECLASSIFIED PER JCS LTR ON
20 AUG. 75

The following is the substance of reports received from Timor up to 28th June, 1943: -

- (1) According to native reports, there has been a considerable withdrawal of enemy troops from the vicinity of LAUTEM during the past week.
- (2) Concurrently it is reliably reported that Jap forces at Ossu, Viqueque and Be Aco have been strengthened. In the opinion of a Portuguese observer the Japs are building up garrison strength in central points such as Ossu and at likely invasion points such as Be Aco in the southern littoral of Sao Domingos province at the expense of Lautem and other north coast garrisons.
- (3) There are 700 Japs camped above the small reservoir at Ossu and about 500 in the bush behind the Customs shed at Be Aco.
- (4) A mid-month Jap patrol starting from Viqueque followed the road to the Luca River and then followed the river to the beach and back east to Be Aco. Luca River is about as far west as the enemy 'scouts' from Be Aco without the use of natives. Farther west, past the Dilor to Kiras, patrol is left to a native outfit whose performance is apt to be perfunctory.
- (5) In lower Manatuto, Keras appears to be the main garrison point with about 100 Japs. At Crihas, Iaclubar, Fatu Berliu and Barique there are only a few Japs at each of these posts.
- (6) At Be Aco hundreds of natives have lately been employed in bringing in the makings of two colossal bonfires as "invasion signals to Ossu", probably by way of precaution against the certainty of loyalist disruptive activities in the event of an Allied landing.
- (7) The Viqueque-Be Aco road has been repaired and is now in fair condition, capable of carrying reasonable motor traffic in the dry season. The ten-mile stretch of roadway from the beach to Viqueque is rumored to be heavily mined and it is definitely known that machine-gun nests exist in the tree tops, particularly in the vicinity of the anchorage itself.
- (8) The chief road construction operation in the province is taking on the Baguia-Uato Caraban track. Here the eight miles of tiring sinuosities of the old track are being improved across and along the ridges and tributaries of the Salibere River with the object of completing a cross-island road from the Ira Bere River close to the south coast to the northern anchorage of Laga.

Information Report No. 675

1. The above project covers coast watchers in the Solomons within SWPA south of BOUGAINVILLE. They are controlled by DSIO, LUNGA, who is the AIB representative in that area.

2. While periodical reports are submitted showing the information received through Service channels by COIC from other AIB projects, this practise has not been followed in the case of Project 1 because much of it was of local interest to forces operating from the SOUPAC area.

3. As an indication of the volume and type of information supplied by these watchers during current operations, there is attached hereto copies of messages containing information from this source, which were included in the message pack attached to GHQ Situation Report No. 163/43, dated 2400K/7th July.

4. Information from these sources is shown in the COIC Situation Report as being transmitted by ANLO, VILA.

SUBJECT: Timor.

TO : Distribution as below.

1. The following information has been received from TIMOR during the period 29th June to 23rd July, 1943: The bombing referred to in paragraph 6 has now been arranged:

- a. The Japanese, with the support of natives, continue to seek the band of 70 Portuguese refugees which recently was surprised and attacked with mortars and machine guns by two hundred Japanese.
- b. A report received on 31/7/43 states that during the bombing by our aircraft of LAUTEM (presumably on 2nd and 3rd June) over one hundred Japanese were killed and many wounded. Included among the killed was one senior officer - rank not stated.
- c. It is also reported (21/7/43) that the Japanese are withdrawing from ALIAMBATA (on South Coast) but are retaining one O.P. comprising four men at BABULO.
NOTE: BABULO is situated approximately 15 miles North of ALIAMBATA.
- d. Portuguese Party Leader reports that the Japanese are informing the Natives that an Allied invasion of Timor is imminent.
- e. Information from Native sources indicates that some of Jap troops in Eastern Timor have been service in New Guinea.
- f. From information received from reliable sources the Porto Leader gives CESU, in Central SAO DOMINGOS Province, as the main point of enemy troop concentration in Eastern Timor. He has repeatedly urged the bombing of this point, so far without response. Incidentally he says that the bombing of CESU would relieve enemy pressure on the refugees and would expedite their evacuation.

NOTE: The evacuation operation is temporarily in abeyance owing to enemy pressure.

Information

NEFIS
July 24, 1943

Bombing of airdrome at NABIRE has been very effective. Thirty to fifty Japs and workmen were killed during each raid. The airdrome was given up by the Japanese who left only 50 Japs on guard, who were billeted at the NABAROWO River $1\frac{1}{2}$ miles E. of NABIRE.

Possible airdrome KEBAR PLAIN at $0^{\circ}40'$ S and between $133^{\circ}15'$ E and $132^{\circ}45'$ E, general direction East/West.

NEFIS
July 26, 1943

The Japanese employed in construction of airdrome on KEBAR Plain are said to come from PALAO. Reliable information states that there are no airdromes at NOMI and WAREN but only rice fields layed out by the Japs.

Information about NABIRE up to 15th June states that the Japanese originally intended to build a big airdrome. They had 300 soldiers under command of a captain, 600 Japs labour corps ex PALAO, 900 natives, 10 tractors, 100 lorries, 50 trucks. The airdrome was to be for 100 planes. There were no A/A guns - only machineguns. The A/A guns visible were wooden dummies. Bombs were stored near Jap huts west of airdrome.
