1. Despite fact that limitation has not yet been placed on domestic use and exports still on open end basis, supply situation so critical that Army experiencing difficulty procuring direct military requirements. Under these circumstances, consider that DA procurement with GARIOA funds would meet with little success. This view evidenced by fact that supplier holding contract for 2000 mtons asbestos on SOA 62-4-403 has been unable to complete delivery even with strong Army support and must cancel quantity remaining. Shipments this program will result in final grades and quantities as follows:

3 K and similar	35.71 NLT
4 K and similar	74.911 NLT
5 D and similar	415.04 NLT
Total	525.661 NLT

2. Requirements cited URMSG Z 38046 transmitted appropriate agencies. If and when commodity place under allocation, DA will press for substantial quota for Japan.

3. End use Grade 5 D not included URMSG Z 38046. Is this substitute for type produced in Japan and, if so, is it possible to increase indigenous production with corresponding reduction import requirement this grade?

4. For time being recommend that every effort be made by Jap importers to procure through commercial channels with special effort to procure from those suppliers with whom Japan did business before the war.
