Problem: Determination of civilian employees on Panay, P. I.,
under Missing Persons Act.

Discussion: The following cantonment construction on Panay,
were started about 5 September 1941 and work
was suspended approximately 15 December 1941
by order of the C.G.,
61st Div P.A.

Anilao
Dingle
Pototan

Construction of Landing Fields on Panay began in January
were located in the following provinces;

In Iloilo province;

Mandurriao
Santa Barbara
Sara

In Capiz province;

Dumaseo
Pilar

In Antique province;

San Jose

Work started on above fields in January 1942.

Construction of these fields were never completed.

Civilian employees were not working at all fields at time
of Japanese invasion.

American Civilian Mining Engineers were construction
engineers.

All technical work in the field was under the supervision
of American civilians.

American civilians only were on per annum or monthly basis
and were paid thru the Finance Officers of the 61st Division.

Policy No. I

1) With the exception of certain special people - the Filipino prisoners are to be given training and then set at liberty. Then they are to be made use of.

Uncomitantly with this temporary period of supposed liberty, they should be observed for a time, and then given complete freedom.

2) The reason for this period of liberty for the prisoners is that it will assist in accelerating the great changes that our various plans contemplate - particularly from the point of view of our military affairs and military government.

Point Number II

3) Military Plans of the Japanese Army - Supply - Co-operation with the military government (etc.) - Prisoners who number among the families of those people who give assistance will speedily be set at temporary liberty.

4) For the sake of the convalescence at their own homes of people who are ill - there must be speedily established an area of general tranquility - and these people are to be set at liberty.

5) According to varying conditions if temporary liberty cannot be granted - the Philippine Administration, making use of mutual public groups, shall be made to take care of these

DECLASSIFIED

Authority 883078

and be responsible for their convalescence.

Management of prisoners in general.

(A) In general, in accordance with the following points, prisoners shall be given training and then set at temporary liberty.

(1) For officers, about three weeks of education starting during the last ten days of July will be enforced. Then the requisite number of people will be set at temporary liberty.

(2) Non-commissioned officers;

Officers who have completed their education will serve as instructors for Non-commissioned officers who, after approximately two weeks training will eventually be set at temporary liberty.

(3) In so far as prisoners living in areas other than the Luzon region - referring in general to their previous number, they are to be educated and ultimately be set at temporary liberty.

(4) According to classes 3(DAI ?) and 4(DAI ?) those prisoners temporarily set at liberty will at a convenient time summon the Filipino youth together and instruct them.

Also in regards to already educated prisoners in the occasion when they are to be used in police supervised agricultural and industrial development, they are to be assembled and, once again, given instruction.

7) Treatment of Special Prisoners:

Those persons who have in thought or in action become unsatisfactory, and those persons who have been set at liberty and this action being deemed inadvisable (for example; persons who, though temporarily at liberty, are still unemployed) are to be detained (same as before) and, with considerable exertion, are to be enlightened. Those persons who have then become favorably disposed and those for whom the cause for detention has vanished are to be temporarily set at liberty at some suitable.

8) Utilization of Prisoners.

(1) Superior persons are to be appointed to the Philippine Constabulary (literally police unit) and to the Philippine Island Defence unit (as men are necessary for the purpose).

(2) Those who are technically skilled and are specialized will be used in industrial and agricultural development.

In so far as the needs of industry and agriculture are concerned, we shall, according to our needs and desires, requisition others * for forced labor.

(*Note - "others" refers to people who are not technically skilled or superior)

9) At that period when enforcement of stability and peace throughout the Philippine Islands is accomplished and the entire body of the Philippine people is co-operating with the Japanese Army - the people will be given their complete freedom.
