1. The first part of the report is a general introduction to the subject of the study. It discusses the importance of the problem and the objectives of the investigation. It also mentions the scope of the study and the methods used.

2. The second part of the report is a detailed description of the experimental procedure. It includes a list of the materials and equipment used, a description of the experimental setup, and a step-by-step account of the experiments performed. It also includes a discussion of the results obtained and a comparison with the theoretical predictions.

3. The third part of the report is a discussion of the results of the experiments. It includes a summary of the main findings, a discussion of the factors that affect the results, and a comparison with the results of other experiments. It also includes a discussion of the implications of the results and the conclusions drawn from the study.

4. The fourth part of the report is a conclusion and a list of references. The conclusion summarizes the main findings of the study and discusses the implications of the results. The list of references includes a list of the books, articles, and other sources used in the study.
