DEFINITION OF A FARM

"A farm, for census purposes, is any parcel or parcels of land at least 1,000 square meters in area, used for the raising of field crops, fruits, vegetables, trees, and/or other agricultural products or for the raising of livestock, poultry and other animals. A farm includes all parcels, lots or pieces of land actually worked by one person, either by his own labor alone or with the assistance of members of his family or hired employees. When a landowner has one or more tenants, the land actually worked by each tenant is considered a farm. Fish ponds are not to be reported as farms."

DEFINITION OF A FARM

"A farm, for census purposes, is any parcel or parcels of land at least 1,000 square meters in area, used for the raising of field crops, fruits, vegetables, trees, and/or other agricultural products or for the raising of livestock, poultry and other animals. A farm includes all parcels, lots or pieces of land actually worked by one person, either by his own labor alone or with the assistance of members of his family or hired employees. When a landowner has one or more tenants, the land actually worked by each tenant is considered a farm. Fish ponds are not to be reported as farms."

DEFINITION OF A FARM

A farm, for census purposes, is any parcel or parcels of land at least 1.00 hectares in area, used for the raising of field crops, fruits, vegetables, trees, and agricultural products or for the raising of livestock, poultry and other animals. It includes all parcels, lots or pieces of land actually worked by one person, either by his own labor alone or with the assistance of members of his family or employees. When a landowner has one or more tenants, the land actually worked by each tenant is considered a farm. Fish ponds are not to be reported as farms.

DEFINITION OF A FARM

A farm, for census purposes, is any parcel or parcels of land at least 1,000 square meters in area, used for the raising of field crops, fruits, vegetables, trees, and/or other agricultural products or for the raising of livestock, poultry and other animals. A farm includes all parcels, lots or pieces of land actually worked by one person, either by his own labor alone or with the assistance of members of his family or hired employees. When a landowner has one or more tenants, the land actually worked by each tenant is considered a farm. Fish ponds are not to be reported as farms.
